## Healing is Voltage Dr. Jerry Tennant

*We are constantly wearing out our cells and have to replace them. We get new cones in our retina and replace the lining of our gut every 2-3 days. We replace our skin every 6 weeks and our liver every 8 weeks. Chronic disease occurs when we lose our ability to make new cells. Dr. Tennant discusses how that happens and what to do to correct it.*

The *Integrative Health Conference & Biomodulator Training* begins Thursday evening with a 2-hour keynote presentation that introduces participants to *Healing is Voltage* and helps one understand how the body works, why chronic disease occurs, and how to use Dr. Tennant's teachings and technology to have better health. This keynote is open to the public. We encourage conference participants to bring colleagues, staff, family and friends. The journey continues on Friday and Saturday for registered participants as Dr. Tennant delves into more detail about the importance of adequate voltage in wellness. He also teaches the use of the Tennant Biomodulator®.

Dr. Tennant invites select guest speakers who enhance learning on topics such as *The Dental Connection to Wellness*, humic/fulvic nutritional supplementation, the importance of nitric oxide and pure, alkaline water in the healing process and more. Each of these topics are cornerstones in Dr. Tennant's *Healing is Voltage* principles for wellness. These experts bring their depth of understanding to assist participants with the next level of understanding about these key principles. Dr. Tennant now includes content in these classes that he previously only taught in the *Dr. Tennant's Advanced (Master Class) Training*. Many find it beneficial to use their Senergy Alumni training privileges to attend this conference, not only to review basic concepts and principles but update on new information being presented.

Past conference participants often comment about the value and importance of the conference content and the sense of empowerment to use the tools and teachings in making pro-active choices for personal health care options. You'll meet other practitioners, first-time participants and some who have attended these learning events multiple times.
